All items must be completed before a patio plan check can be processed.

1. Building Permit Application Form
2. Plot Plan (Drawing of your own home)
3. Standard Patio Plan Form (All sizes must be filled in)
4. Signed Patio Inspection Form
5. Signed Smoke & Carbon Form

Once you have completed the items listed above, please turn in the forms to the Building Department.

Todos los artículos deben ser completados antes de que un plano de patio pueda ser procesado.

1. Aplicación de construcción
2. Plano del diagrama de su propio hogar
3. Forma estándar del plan del patio
4. Forma firmada de la inspección del patio
5. Forma firmada de alarma de humo y carbono

Cuando haya terminado los artículos enumerados, por favor entregue los formularios al departamento de construcción.

Applicant/Owner          Verified by
Declaration of Installation
for Smoke Alarms and Carbon Monoxide Alarms

Dear Property Owner or Licensed Contractor:

The California Residential Code (CRC) requires carbon monoxide alarms (CO alarms) in dwellings as well as smoke alarms when building permits are issued and the scope of work exceeds a total cost or calculated valuation of $1,000. In order to grant a final approval on your permit, it is necessary to verify the installation of these alarms within your dwelling. This form provides the ability to self-verify to the Building Department staff when work done does not allow convenient access to the interior of the dwelling (e.g., re-roof or other exterior work).

As of January 1, 2014 all new and replacement battery operated smoke alarms must be equipped with a non-replaceable, non-removable battery capable of powering the alarm for ten years. All existing smoke alarms shall be replaced after ten year from the date of manufacture of if the date of manufacture cannot be determined.

DECLARATION OF INSTALLATION UNDER PENALTY OF PERJURY

By signing this document as the owner or licensed contractor, I/we affirm and declare under the penalty of perjury, under the laws of the State of California, by our signatures below as owner or licensed contractor, that I/we will comply prior to final inspection with Items A & B as specified herein:

A. Smoke alarms are installed in accordance with the approved manufacturer’s instructions in all of the following areas:
   1. Each sleeping room
   2. Outside each separate sleeping area in the immediate vicinity of the bedrooms
   3. On each floor, if a multi-story
   4. In the basement, if a basement exists

B. Carbon Monoxide alarms are installed in accordance with the approved manufacturer’s instructions in all of the following areas where fossil fuel burning appliances are installed, including fireplaces or when there is an attached garage to residence:
   1. Outside each sleeping room
   2. On every floor level of the dwelling unit, including basements, outside each sleeping unit.

Contractor’s signature: ____________________________ Date: ______________
What is a Plot Plan?

A Plot Plan (also called a Site Plan) is a scale drawing that shows the size and configuration of your property and the size and location of existing and proposed improvement features, such as buildings, driveways, sidewalks, etc. on the property.

A Plot plan shows both what currently exists and what physical changes you wish to make.

When Do I Need to Draw a Plot Plan?

Plot Plans are required to accompany most applications that you will make to the City in order to get approval to change how your property is used. A Plot Plan is often used in conjunction with Site Plan Review, Conditional Use Permits, Variances and building permits.

What Items Are to Be Shown on a Plot Plan?

The sample plot plan to the right shows key information that should be shown on a simple plot plan. In general, a Plot Plan should show the following information:

1. Name and address of the owner of the property.

Continued on back panel
2. Show Assessor Parcel Number (APN) of subject property. The APN can be obtained at City Hall or the County Assessor's office.

3. Address of the property (if different than the owner's address).

4. The location and dimension of existing and proposed building improvements. Show setbacks to all adjacent property lines.

5. The location and dimensions of all parking areas and driveways (existing and proposed).

6. Identification of adjacent streets (by name), alleys or other adjacent public property.

7. Any easements that cross the property or other pertinent legal features.

8. A north arrow and scale. Scale should be engineering style (e.g., 1" = 10 feet, for example).

9. Existing property lines and property easements.

10. Dimensions showing front, side and rear yard setbacks, size of structures, paving, porches and decks, as applicable.

11. Identification of what work is to be done, including the changes that are proposed to the physical features of the site or existing structures.

12. A vicinity map showing where the subject site is located in relation to streets and landmarks.

13. Show location of underground utilities, if known.

14. Plot plan should be shown at the largest scale possible.

The plot plan example shown on this brochure is for relatively simple projects. New multi-family, commercial or industrial projects typically require more detailed plans. The City has examples of site plans that it can share to illustrate what is required for these kinds of projects.

For more information on Plot Plans as well as general planning and zoning information, please contact Firebaugh City Hall at (559) 659-5900.
