Declaration of Installation for Smoke Alarms and Carbon Monoxide Alarms

Building Permit # _____

Project Address: _____

Dear Property Owner or Licensed Contractor:

The California Residential Code (CRC) requires carbon monoxide alarms (CO alarms) in dwellings as well as smoke alarms when building permits are issued and the scope of work exceeds a total cost or calculated valuation of \$1,000. In order to grant a final approval on your permit, it is necessary to verify the installation of these alarms within your dwelling. This form provides the ability to self-verify to the Building Department staff when work done does not allow convenient access to the interior of the dwelling (e.g., re-roof or other exterior work).

As of January 1, 2014 all new and replacement battery operated smoke alarms must be equipped with a non-replaceable, non-removable battery capable of powering the alarm for ten years. All existing smoke alarms shall be replaced after ten year from the date of manufacture of if the date of manufacture cannot be determined.

DECLARATION OF INSTALLATION UNDER PENALTY OF PERJURY

By signing this document as the owner or licensed contractor, I/we affirm and declare under the penalty of perjury, under the laws of the State of California, by our signatures below as owner or licensed contractor, that I/we will comply prior to final inspection with Items A & B as specified herein:

- A. Smoke alarms are installed in accordance with the approved manufacturer's instructions in all of the following areas:
 1. Each sleeping room
 2. Outside each separate sleeping area in the immediate vicinity of the bedrooms
 3. On each floor, if a multi-story
 4. In the basement, if a basement exists

- B. Carbon Monoxide alarms are installed in accordance with the approved manufacturer's instructions in all of the following areas where fossil fuel burning appliances are installed, including fireplaces or when there is an attached garage to residence:
 1. Outside each sleeping room
 2. On every floor level of the dwelling unit, including basements, outside each sleeping unit.

RESIDENTIAL REROOF PROCEDURES FOR COOL ROOF PRODUCTS
2013 CALIFORNIA ENERGY CODE SECTION 150.2(b) H

Beginning July 1, 2014, the 2013 California Energy Efficiency Standards will go into effect and require all re-roofing to meet the Cool Roof requirements of the updated Title 24 Energy Standards. Roofing products that are used for compliance with the standards are required to be tested and labeled by the Cool Roof Rating Council (CRRC)

The new 2013 California Energy Code has revised the list of alternatives that can be used as an exception to the Cool Roof requirements. This bulletin is designed to provide the new exceptions allowed in the 2013 Standards and how the local jurisdictions will document and verify compliance with the exceptions.

2013 Cool Roof Exceptions:

- a. Air-space of 1.0 inch is provided between the top of the roof deck to the bottom of the roofing product; or
- b. The installed roofing product has a profile ratio of rise to width of 1 to 5 for 50 percent or greater of the width of the roofing product; or
- c. Existing ducts in the attic are insulated and sealed according to Section 150.1(c)9, HERS rating is required with CR-3R Form; or
- d. R-38 attic insulation (Insulation Certificate required); or
- e. Buildings with a radiant barrier in the attic meeting the requirements of Section 150.1(c)2; or
- f. Buildings that have no ducts in the attic; or
- g. R-4 insulation installed on the deck above vented attic.

As shown above, the exception by providing increased attic ventilation has been removed in the 2013 Standards, and insulation values have increased.

- If exception "c" is proposed, it shall be required that a duct leakage test be provided and certified by a third party HERS rater.
- If exception "d" is proposed, it shall require an Insulation Certificate be provided by a licensed Insulation Contractor to verify the minimum R-38 attic insulation exists.

Solar PV Re-Roofing Policy (Residential)

For residences with an existing Solar Photovoltaic (PV) rooftop system

GENERAL PERMIT REQUIREMENTS

The following requirements apply to any re-roofing project on a residence that has an existing solar photovoltaic system installed on the roof and where such system must be removed and re-installed in order to complete the reroofing project.

- A separate permit will be required for each of the following:
 1. **Re-roof permit**- May include any repair work to the roof framing or other similar work directly related to the re-roof
 2. **Solar PV permit**- Only required for removal and re-installation of the PV system in cases where the system is being modified in any way (as described below)
- A re-roofing permit can only be issued to a licensed C-39 roofing contractor, or issued to an 'owner builder', as allowed by state law. A re-roofing permit may also be issued to a 'B' licensed contractor under certain conditions when part of a larger project.
- Removal and re-installation/modification of the solar PV system must be done by a licensed C-46 solar contractor, C-10 electrical contractor, or "A" or "B" licensed contractor. **A C-39 roofing contractor or homeowner cannot remove and re-install the solar PV system.**
- Before the permit can be issued a 'Homeowner Re-roofing Clearance Form' must be completed and signed by the homeowner (see reverse side of this sheet).

MODIFICATIONS TO THE PV SYSTEM

Should any modifications to the original PV system be made as part of the removal and re-installation, plans and specifications outlining the changes must be submitted to the Building Department for review. A separate plan review and permit will be required in such cases.

Modifications could include any of the following:

- Changing the original location or layout of the PV array on the roof
- Adding new panels to the system or enlarging the system in any way
- Upgrading or changing any of the equipment associated with the system including the inverter, the individual modules, or any other components of the original system
- Upgrading the existing electric service panel (service panel upgrades require a separate permit)

RE-ROOFING CONCURRENT WITH A NEW SOLAR PV INSTALLATION

- In cases where a re-roof is to be done concurrently with a new solar PV installation, a separate permit for each scope of work is required. A C-46 solar contractor is not licensed to do the re-roofing work.

BUILDING DEPARTMENT

Homeowner Re-Roofing Clearance Form

For a residence with an existing rooftop solar photovoltaic (PV) system

In order to process a permit for a re-roofing project with an existing rooftop solar photovoltaic system, please provide the following information and compliance certification signed by the homeowner.

Property address: _____

Homeowner's name: _____ Phone: _____

The existing solar photovoltaic system installed on my home is:

Owned

Leased

Name of leasing company _____

For leased systems: it is the homeowner's responsibility to notify the leasing company and make arrangements with them to have the rooftop modules and racking system temporarily removed to allow for the installation of the new roofing. Upon completion of the re-roof the leasing company must re-install the modules in the original location on the roof. Any modification to the original system requires a separate permit.

For owned systems: a licensed C-46 solar contractor, C-10 electrical contractor, or "A" or "B" licensed contractor must be employed to remove and re-install the rooftop modules. Modules must be installed in the original location on the roof. Any modification to the original system requires a separate permit.

Note: A C-39 roofing contractor or homeowner cannot remove and re-install the PV system.

COMPLIANCE CERTIFICATION

As the homeowner of the above residence, I agree to comply with the above requirements for removing and re-installing the existing solar photovoltaic system. I also understand that any modifications to the existing system, including changing the location, adding new modules, or upgrading any of the equipment will require a separate permit from the Building Department.

HOMEOWNER SIGNATURE

DATE

THIS FORM MUST BE COMPLETED BY THE HOMEOWNER AND SUBMITTED TO THE BUILDING DEPARTMENT BEFORE THE PERMIT FOR THE RE-ROOF CAN BE ISSUED.
